More Outstanding Resources for Educators (M.O.R.E)

M.O.R.E. is a comprehensive resource guide for teachers and administrators of hands-on activities, science materials, online magazines, television shows, professional development programs, contests, grants, museums, educational reform, standards and many other resources that will enhance K-12 math and science education in the classroom and at home. The listings have been hand picked and are some of the best resources. Not to mention that the majority of them are free! The listings are easy to read and clearly marked with symbols if they are a recommended site, if there is a fee for the service, or if the resource is only a website. This guide is intended to aid and support teachers in their endeavor to promote math and science interest in students. So, if you are a teacher, please pass this guide on to your colleagues!

How to Order

Make check or money order payable to:

ATTN: Al Staropoli
ASPIRA Association, Inc
MORE Publications
1444 I St, NW Ste 800
Washington, DC 20005

Send your address and the number of MORE Resource Guides you'd like to receive.
