

## How to Access the Curriculum

- [Log in](#) [1] to post comments

This curriculum is one of the first comprehensive insurance literacy tools of its kind. It comprises five separate, stand-alone units that can be taught individually or in combination, depending on the target audience's needs. The units are: Introduction to Insurance; Auto Insurance; Renters Insurance; Homeowners Insurance and Life Insurance. Due to the complexities of the issue, health insurance is mentioned but not covered in detail. Each unit may be taught in a workshop format and lasts about one hour. Additionally, the curriculum contains the option of being broken into shorter activities that may be incorporated into existing high school or financial literacy courses.

Each module and its handouts are available in PDF format. In order to download and print each curricular component you will need Adobe® Reader. Adobe® Reader® 6.0 is free software that lets you view and print Adobe Portable Document Format (PDF) files on a variety of hardware and operating system platforms. To download Adobe® Reader click on the image below.
