

Are Your Investments Working The Way You Expected?

- [Log in](#) [1] to post comments

Investing is an interesting business, full of paradoxes and strange twists that often confuse and mislead newcomers. Even casual observers are probably familiar with the contrary market behavior often associated with good economic news, and vice versa. Those experienced in the ways of Wall Street also know that being early and being wrong look the same. Mistakes and opportunities can also look very similar. Perhaps oddest of all — in order to do well, you have to do poorly. The failure to understand this — one of the most basic facts of investment life — is probably the single most important cause of genuinely poor results, excessive risk taking, high costs, and wasted brainpower in the investment business.

This module will help you to understand how to assess if your investments are working the way you expected.

Curriculum PDF files

- [Module 6](#) [2]: Participants version pdf file.
- [Module 6](#) [3]: Facilitators version pdf file.
- [Module 6 Power Point Presentation](#) [4]
- [PowerPoint Presentation Handout](#) [5]
